## Combination possibilities

The Vario-Pad Mini's new lower adjustment range enables laying at a gradient to be begun at a minimum height of just 20 mm. As with the Vario-Pad 2, it is important after you have done the fine adjustment to engage the reverse motion lock in order to prevent any subsequent shifting of the pad.

The Vario-Pad Mini can be combined with the Multi-Pad, the Multi-Pad+PLUS and the Maxi-Shim.

To level out heights a maximum of 6 Multi-Pad and/or Multi-Pad+PLUS supports can be stacked on top of each other and laid with Vario-Pad Mini units.

Vario-Pad Mini with reverse motion lock and Multi-Pad
